1.1	Usage	3

HRMSOFTWORKS (/lu'make/) is a HRIS Software that manages your team profile and payroll. You can checkout the two versions of our software here *HRMSOFTWORKS* <<https://www.hrmssoftworks.com/>>.

Check out the *Usage* section for further information, including how to *Installation* the project.

Note: This project is under active development - CURRENTLY SUPPORTED PHP 7.4

CONTENTS

1.1 Usage

1.1.1 Requirements

Before using our HRM, you need the following technology stack in your hosting.

```
>>> PHP 7 or above
>>> MySQL
```

1.1.2 Installation

To use our HRM, first install it using the following steps:

```
(.venv) $ pip install lumache
```

1.1.3 Creating recipes

To retrieve a list of random ingredients, you can use the `lumache.get_random_ingredients()` function:

The `kind` parameter should be either `"meat"`, `"fish"`, or `"veggies"`. Otherwise, `lumache.get_random_ingredients()` will raise an exception.

For example:

```
>>> import lumache
>>> lumache.get_random_ingredients()
['shells', 'gorgonzola', 'parsley']
```
